

SERVICE DISCONNECT ADAPTER (SDA-45)

PRODUCT DATA SHEET

Meter readers will quickly spot the disconnect because the meter is at a 45° angle.

FEATURES

- Rugged polycarbonate construction
- High dielectric strength; withstands 10,000 volts
- Easy to install
- Low profile
- Meter can be stored in socket following disconnection
- Positive disconnect in clamp-jaw sockets
- Fits ring or ringless sockets
- Easy checks for cutoffs
- Meter isolated from socket jaws
- Prevents power leaking to customer
- Especially cost-effective because it can be used over and over

INSTALLATION INSTRUCTIONS

1. Remove meter from socket
2. Install SDA 45 on socket
3. Install socket cover (ringless style)
4. Mount meter at a 45° angle on top of the SDA-45
5. Reseal meter in usual manner

APPLICATIONS

Brooks SDA-45 provides a safe and economical means of disconnecting service on installations where it is not desirable to return meters to the shop.
