

LP SERIES

Product Data Sheet

Brooks' LP Series Adapters provide OEM's and utilities with the lowest profile interbase adapter for housing communication, monitoring, surge protection or other extended range service equipment.

APPLICATIONS

Brooks' LP Series adapters were designed for communication cable routing, monitoring equipment and service provider access in a very low profile package.

FEATURES

- UL Listed, one-piece injection-molded polycarbonate interbase adapter.
- Lowest profile on the market at 1.2" depth.
- Clear dead-front safety shield.
- 11 jaw/blade locations with or without wire connection points.
- Optional sealing ring available.
