

FlexSecure

Product Data Sheet

Tamper-evident cable seal that separates into individual strands when cut, and cannot be resealed.

FEATURES

- The seal body is constructed of aluminum alloy, offering color and customized identification.
- 12 inch galvanized, non-preformed aircraft security cable comes in 1/16", 3/16", and 1/8" diameters. Additional lengths available.
- Marking is stamped with sequential numbering; max 2 lines up to 6 characters and 6 digits.
- Customization options include additional color choices, and laser printing name, logo, consecutive numbers, or barcode.
- 200 seals per box.

APPLICATIONS

Used in securing primary metering cabinets, transockets, gas and electrical meter enclosures, the FlexSecure delivers unmistakable tamper evidence. Even at its thinnest gauge, FlexSecure outperforms comparable sized seals on durability. Offered in three cable gauges, it's a non-resealable, single-use option built to match any application size.
